

Help menus and options:

Search box

Title:

Search Box

Help text:

This is what we like to call the Magic box, here, you are on the search tab. Try entering one word and see what it does.

These words are tags, they tell you more about the content of a jot.

Every time you search, you will see tags and related tags appearing below.

Click like a madman, you will find what you are looking for!

You can also look for users, try looking for @jotky and see what happens.

if tags are already entered when the box is dragged

Link: Save your search, it will appear in your nest, on the right of your screen, you can drag the saved searches here for more information

Jot Bar

Title:

Jot Box

Help Text:

This is what we like to call the Magic box, here, you are on the jot tab.

You can post jots and interact with it through commands

Jots are four things:

The title: What is your jot about? Tell us!

The tags: When you are typing in the title, you can add tags automatically, just type #jot or #whateveryouwant and they will be added to your jot. If you keep it relevant, you'll probably get some thumb-ups!

The body: Express yourself in 500 characters.

The attachments: Attach links, pictures or videos from YouTube, sharing is caring..or not. But it's still fun, give it a try!

Commands: the other way to be a geek

Currently, two commands are available: !t and !fb. They will let you post your jot to Twitter and Facebook when you post them on Jotky.

Stay tuned for more, because we are working on !clean_my_room and !find_me_a_date.

Jots

Title:

This is a jot

Help text:

This is a jot, the little nugget of information you're probably looking for. You can thumb up, favorite, thumb down or hide jots, and it will influence their popularity.

Actions:

- Add to favorite
- Search for this jot's tags
- Add this jot's tags to your saved searches
- Got to this jot author's profile
- Follow this jot's author

Avatars

Title:

This is {%username}.

Help text:

Do you find {%username}'s jots interesting? Follow her(him) to see everything (s)he has to say. If you are already following {%username} and {%username} is already following you, you can send each other private messages.

Actions:

- Follow/Unfollow{%username}
- Block/Unblock{%username}
- Go to {%username}'s profile
- if friends
Send {%username} a private message

In-jot tags

Title:

Tag: {%tagname}

Help text:

These are tags, you can use them to classify your Jots and tell fellow jotters what your content is about. You can use up to 15 per jot.

Actions

- Search for this tag
- Save this tag as a saved search

Nest

Title:

This is the nest

Help text:

The nest is this place where all the tags you follow come and, well, nest together in groups. The content of these saved searches will automatically show on your home page when they are updated, unless you turn the group off, by clicking the “**on/off**” button just below the group’s name.

When you save a search, that saved search is , by default, put in the ‘Uncategorized’ group.

You can create more groups by clicking the ‘+’ icon in the top-right corner of the box.

Once done, just drag and drop saved searches to move them from a group to the other.

You can access saved searches results individually just by clicking on their name.

Actions:

- Clear the nest - This will remove all your saved searches and all your groups and can’t be undone.
- Remove all groups - This will put all your saved searches back in the uncategorized group and delete all the other groups. It can’t be undone.

Groups

Title:

Group: {%groupname}

Help text:

Groups are where you can classify your saved searches. When a group is marked as ‘on’, it’s content will populate your home page when updated.

Actions:

- Delete the group {%groupname}
- Move the content of {%groupname} to [dropdown:all groups list]

Favorites

Title:

Favorite: {%jot title}

Help Text:

Found a jot you like? Fave it!

You will be able to go back to it and see how the conversations is going.

Actions:

- Rename to [textbox]
- Remove from favorites
- Search withs this favorite's tags
